WHY Workflow-Driven Platform

Spatiotemporal
Analysis Software

Executive
Paper

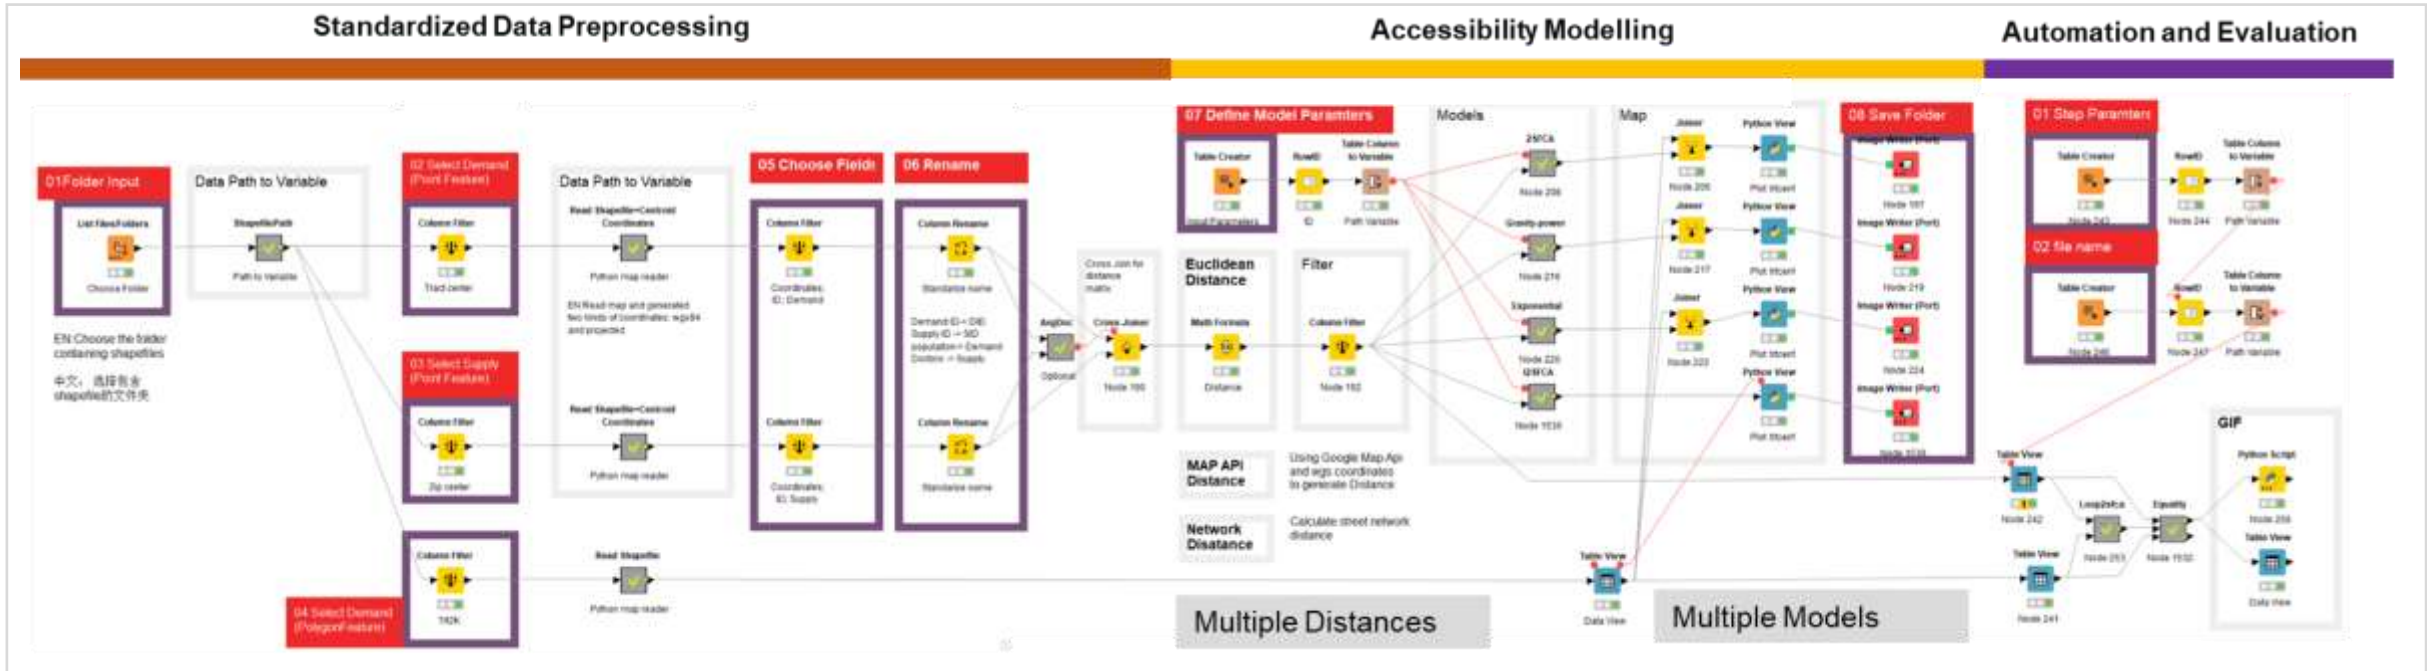

Workflow
Driven

Scalable Structural Expandable Interoperable

WHY Workflow-Driven Platform

Workflow-Based Spatiotemporal Analysis Platform

Workflow of 2SFCA Model

HOW

Workflow-Driven Platform in Spatial Data Lab is Different
KNIME-based Geospatial Cyberinfrastructure Open K-GCI

Lingbo Liu , Fahui Wang, Weihe Wendy Guan*, Shuming Bao, Chaowei Yang, Hanchen Yu, Xiaokang Fu, KNIME-based Geospatial Cyberinfrastructure for Open Source GIS Education 3.0 , 2022, under Peer View

HOW Open K-GCI is Different

Workflow Platform with Multi-Coding Language Support

<https://rapidminer.com>

<https://www.alteryx.com>

End to End Data Science

At KNIME, we build software to create and productionize data science using one easy and intuitive environment, enabling every stakeholder in the data science process to focus on what they do best.

<https://www.knime.com/>

HOW Open K-GCI is Different

Workflow Platform Comparison

SoftWare	Language Support	Open Source	Cost	Built-in Geospatial Function	Data Limit	Server
Orange	Python	Yes	Free	x	No	x
R AnalyticFlow	R	Yes	Free	x	No	x
Alteryx	Python, R, JavaScript	Yes	Education license	Yes	No limit	Yes
RapidMiner	Python, R, Java	x	Education license	x	10,000 rows	Yes
KNIME	Python, R, JavaScript	x	Free(KNIME analytic platform) Education license(KNIME Sever-Small)	x	No limit	Yes

HOW Open K-GCI is Different

Codeless Visual Programming

Open K-GCI

Scalable Structural Replicable Expandable Interoperable

Standard Nodes + WebPortal-based Executable Paper

HOW Open K-GCI is Different

Enable Crowdsourcing Customized Tools— Standardize Variables

HOW Open K-GCI is Different

Enable Crowdsourcing Customized Tools— Standardize Geospatial Python Nodes

HOW Open K-GCI is Different

KNIME WebPortal for Interoperable and Executable Paper –FIRES

The screenshot shows the web portal interface for a study titled "Measuring spatial accessibility to primary care physicians in Chicago region" by Fahui Wang. The interface includes a navigation bar with "Spatiotemporal Simulation", "Monitoring", and "Administration" options. The main content area displays the study title, author information, and an introduction section. Below the text, there are several interactive components:

- 2SFCA Model**: A map showing spatial accessibility results for the Chicago region.
- Gravity Model**: Another map showing spatial accessibility results.
- DistanceThreshold for 2SFCA**: A dropdown menu set to 32190.
- Power Model for G2SFCA**: A dropdown menu set to 1.
- Exponential Mode for G2SFCA**: A dropdown menu set to 1.
- Gravity Model for G2SFCA**: A dropdown menu set to 1.
- Simulation Times**: A dropdown menu set to 5.
- ThresholdStep**: A dropdown menu set to 5000.

HOW Open K-GCI is Different

Progress in KNIME-CI for Spatiotemporal Simulation

Workbook for

Quantitative Methods and Socio-Economic Applications in GIS

Fahui Wang, Louisiana State University

Workbook for

Workbench for Spatial Data Analysis

Based on the work of Luc Anselin and Stewart Fotheringham

WHAT

The Features

KNIME-based Cyberinfrastructure Open K-GCI

Lingbo Liu , Fahui Wang, Weihe Wendy Guan*, Shuming Bao, Chaowei Yang, Hanchen Yu, Xiaokang Fu, KNIME-based Geospatial Cyberinfrastructure for Open Source GIS Education 3.0 , 2022, under Peer View

WHAT The feature of Open KNIME-CI is

Open-Source GIS Education 3.0

WHAT The feature of Open KNIME-CI is

Hybrid KNIME-CI

EXAMPLE

Telehealth Accessibility by 2SVCA

Lingbo Liu , Fahui Wang, Weihe Wendy Guan*, Shuming Bao, Chaowei Yang, Hanchen Yu, Xiaokang Fu, KNIME-based Geospatial Cyberinfrastructure for Open Source GIS Education 3.0 , 2022, under Peer View

Lingbo Liu, Jennifer Alford-Teaster, Tracy Onega, Fahui Wang, Refining 2SVCA Method for Examining Disparities in Telehealth Accessibility of Primary Care Physicians in Baton Rouge, Louisiana , 2022, Working Paper

EXAMPLE Telehealth Accessibility by 2SVCA

Duality of distance dependence and digital divide

Integrating Physical accessibility and Virtual accessibility (From 2SFCA to 2SVCA)

EXAMPLE Telehealth Accessibility by 2SVCA

Case Study	Exploring the disparity of telehealth accessibility in Baton Rouge Metropolitan Statistic Area (BRMSA)
Methodology	2 Step Virtual Catchment Area (2SVCA) model
Data	Census Data at the block level: Population, Road network, Boundary Hospital Data : Location, Capacity(Number of doctors or hospital beds) Internet Access Data: Fixed broadband speed

Location of BRMSA

Illustration of 2SVCA

Alford-Teaster, J., F. Wang, A. N. A. Tosteson and T. Omega (2021). "Incorporating broadband durability in measuring geographic access to health care in the era of telehealth: A case example of the 2-step virtual catchment area (2SVCA) Method." *J Am Med Inform Assoc* 28(11): 2526-2530.

EXAMPLE Telehealth Accessibility by 2SVCA

Uncertain Spatiotemporal Context in 2SFCA/2SVCA

EXAMPLE

Telehealth Accessibility by 2SVCA

KNIME workflow framework for calculate multiple travel cost

EXAMPLE

Telehealth Accessibility by 2SVCA

EXAMPLE Telehealth Accessibility by 2SVCA

EXAMPLE Telehealth Accessibility by 2SVCA

(a) Virtual accessibility by 2SVCA ($d_0=5-30$ minutes, $b_0=3\text{Mbps}$) vs.(b) physical accessibility by 2SFCA ($d_0=5-30$ minutes)

FUTURE WORK

Knowledge Tree of Spatiotemporal Analysis

Open K-GCI Community

Spatial Data Lab

Knowledge Tree of Spatiotemporal Analysis Theory-Model-Tools-Case Studies

A Data-driven, Workflow-based Cyberinfrastructure
to
Collect, share and update Data
Enable collaborative research on Spatiotemporal Analysis
Build knowledge tree of Spatiotemporal research
Offer training program based on workflows
